

His Majesty's bark Endeavour : the story of the ship and her people / informative text by Antonia MacArthur ; line and wash drawings by Dennis Adams

Description

The Endeavour's incredible voyage of scientific and geographic discovery (1768-1771) has been a source of fascination to the world ever since the ship returned to port. This book tells the story of the ship and the 94 officers, gentlemen, midshipmen, marines and sailors who made that historical voyage with her. It is a lively account of who these men were, how they lived, where they slept, what they ate and, often, how they died.
