

Surfboards / by Guy Motil

Description

Surfers, even top professionals, often describe a favorite board as "magic" and because surfboards have been mostly hand made by master craftsmen, a truly magic board is an object that can be hard to replicate or replace. This comprehensive book--Surfboards--is about those magical objects that allow surfers to harness the natural power of an ocean wave to create a spectacular dance on water or to speed unscathed across a massive, life-threatening wall ten times overhead.
