

Surfing guide to Southern California / by

Bill Cleary, David H. Stern

Description

Part of the preface: The sport of surfing is booming all over the world and is destined to grow increasingly popular each year, the only limit being the total number of rugged individualists who will seek the satisfaction of doing something well and doing it better next time... We have grouped the three hundred or so surfing spots between Point Conception and the Mexican border into fourteen areas, each one a comfortable size to explore on a one-day trip....Leafing through the book you can imagine yourself flying south from POint Conception to Tijuana Sloughs, checking out the spots ahead with occasional glances backward. More careful examination of these pictures will prove them easily worth a thousand words.
