

The legacy of Warren Bolster : master of skateboard photography / photographs by Warren Bolster ; edited by Daniel Gesmer

Description

When urethane wheels hit the skateboard world in the early 1970's, they launched a revolution. By 1974, things had exploded to the point that Surfer Publications decided to resurrect SkateBoarder Magazine. Skateboarder had been lying dormant since 1965 when the first crash of skateboarding hit. Warren Bolster, a surf photographer was chosen to be SkateBoarder's editor. Its an incredible understatement to say that Warren had a fierce determination to document the rebirth of skateboarding. he was literally a one-man army, putting in eighteen hour days photographing, writing and co-coordinating every facet of the magazine.
