

# Basic Detail Report

**the ONLY way to TRAVEL**

- Combined with the latest in advanced design, Gordie boards are unsurpassed for styling and craftsmanship.
- During 6 years of business experience, Gordie has been the first to introduce fiber-glass beaded fins and multi-curved wood stringers. In 1956 he shaped the first double ender surfboard.
- One of the finest examples of Gordie's experience and craftsmanship may be seen in the revolutionary "banjo" board. Like all Gordie boards the "banjo" board is constructed from the finest high density polyurethane foam and fiberglass materials.
- Our shop is one of the few shops remaining where the entire operation is under our supervision.
- Also available are custom contemporary abstracts designed to the surfers' specifications.
- Gordie surfboards include, at no extra cost, 20 oz. glass laminated wood fins with a 1/8 in. glass bead for protection, heavy duty double-glassed deck patches, and 3/4 in. redwood stringer.
