

Hawaiian Brewer gun replica model

Date

The originals were made around 1965, not sure when this replica was made.

Description

Greg Lui-Kwon was instrumental in working out what it would take to get this board made. Greg and I spoke to Jack Reeves and then met with Terry Martin at Hobie's. Brewer wanted to make the boards and Terry not only got Hobie involved but Grubby Clark as well. Those glue ups with the foam stringers were exactly like the originals. Hobie had all the old labels on file, so Terry and I had the original laminate reprinted, got them to Brewer and he just continued the original run as if he had just finished number 81 the week before. — Stephen Gonsalves
